Tour recent account of Mr. Goodwillie's fuerible death from hydrophobia leads me to make known my successful mode of curing such cases. The moment a person is bitten the wound should be washed and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. It is not considered the wound of the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped. If the wound has healed up, open it and cupped it was the wound. Also din cloths into the liquid and bind them on the bitten part. Then let the nation take two or shore wall. Then let the patient take two or three gal-vance baths, with down-running currents an strong as he can bear them for twenty min-utes, about two hours intervening between each bath. Then let the patient take nause-aing doses of tineture of lobella and scull cap for neven or eight hours. Next take a vaper bath for one hour, at as high a tempera-ture as he can well bear it will the head ar-posed to the air. By the above method I osed to the air. By the above method wed three children in the city of Norfolk irginia. who had symptoms of hydrophobia ry strongly exhibited, even up to the point rejecting water.
